

HOPEDALE – DILLONVALE

TRANSMISSION LINE REBUILD PROJECT

An AEP Company

BOUNDLESS ENERGY™

AEP Ohio representatives plan power grid upgrades in Harrison and Jefferson counties. The project involves rebuilding about 15 miles of 69-kilovolt transmission line by replacing wooden poles with steel poles and upgrading local substations. The project improves electric reliability by replacing aging infrastructure and speeding recovery of service when outages occur.

WHAT

The project involves:

- Rebuilding about 15 miles of power line
- Replacing wooden poles with steel poles
- Upgrading local substations

WHY

The Improvements:

- Replace wooden poles that date back to 1918
- Reduce the likelihood of power outages
- Speed recovery of service when outages occur

WHERE

The project area includes:

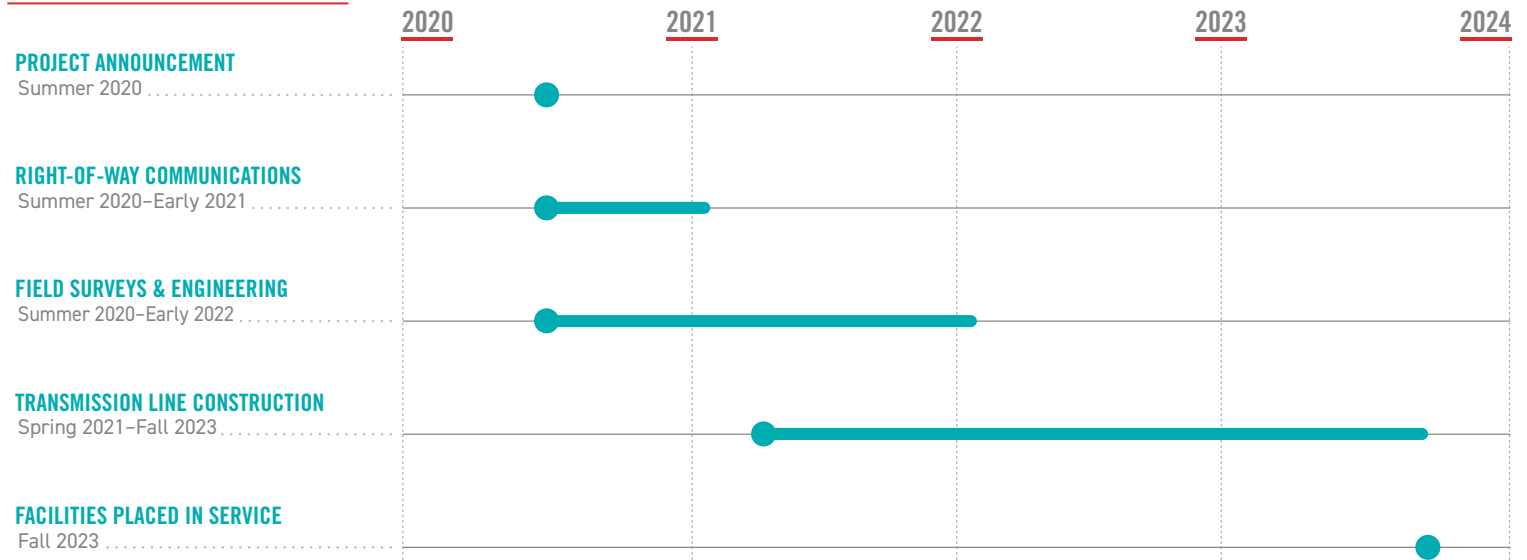

- Harrison County
- Jefferson County

Company representatives plan to rebuild most of the power line in the existing right-of-way, while some sections of the project involve re-routes. Input from the community helps to determine the locations of the re-routes.

Plans include updating, supplementing and acquiring new property easements where necessary to ensure the safe construction, operation and maintenance of the power line.

PROJECT SCHEDULE

*Timeline subject to change.

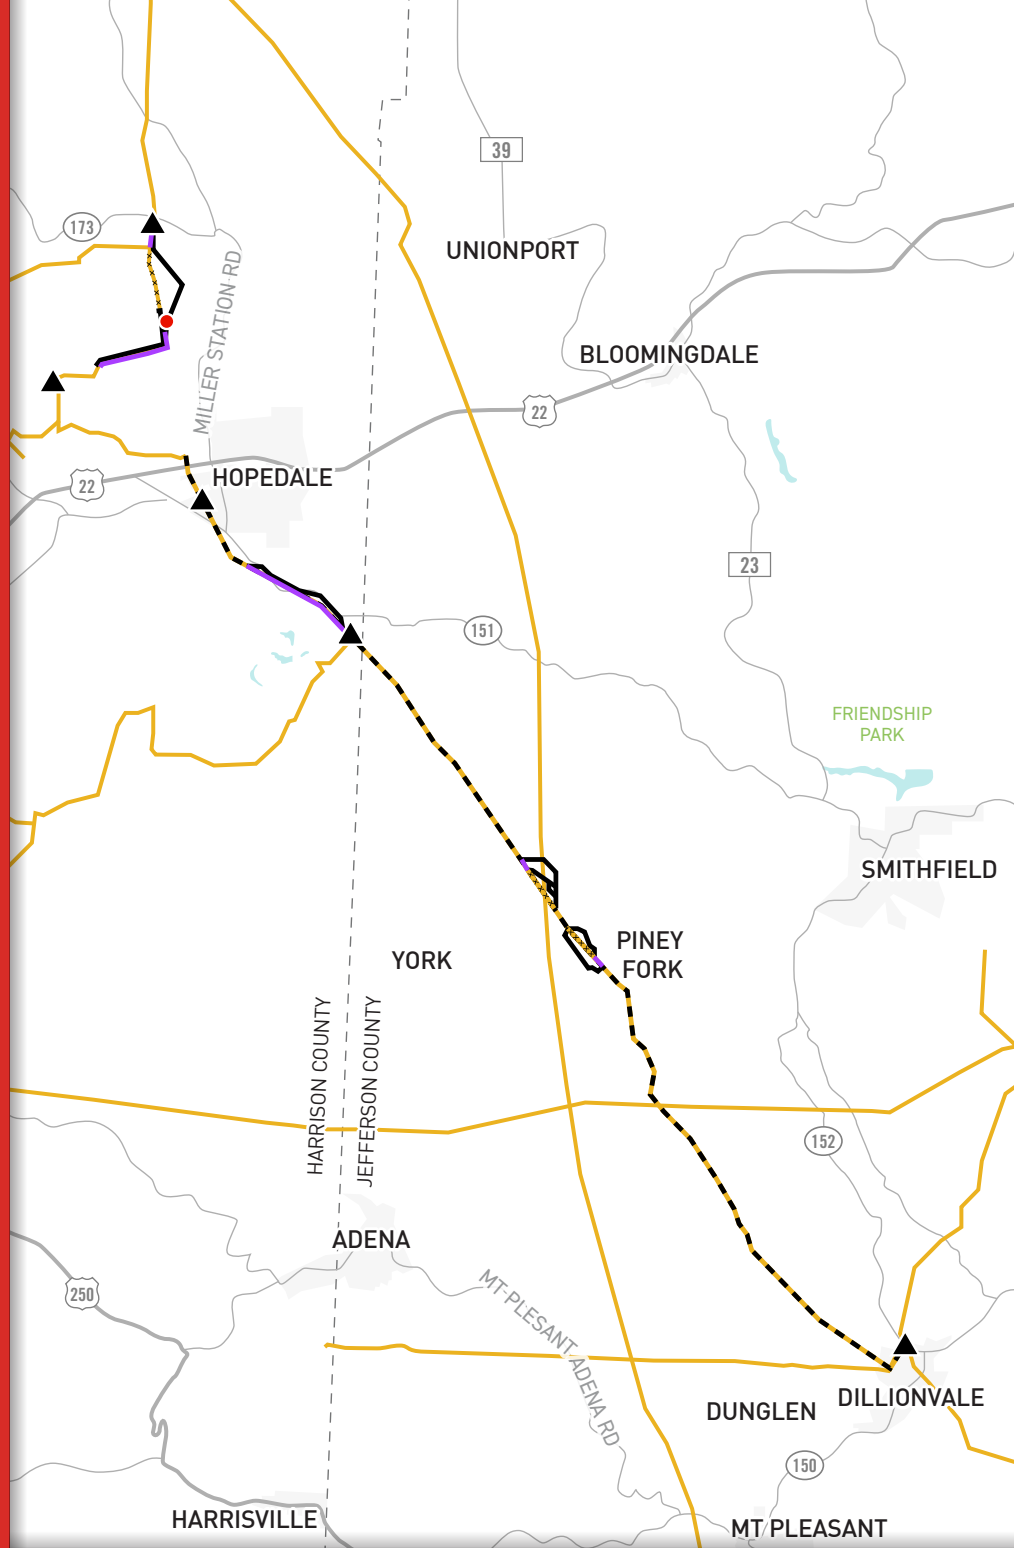

TYPICAL STRUCTURES

The project involves the use of single, steel poles.

Structure Height Range: 75-110 feet*

Right-of-Way Width: 60 feet*

*Exact structure, height and right-of-way requirements may vary

HOPEDALE - DILLONVALE TRANSMISSION LINE REBUILD PROJECT

- TRANSMISSION LINE TO BE REBUILT
- EXISTING TRANSMISSION LINE
- ROUTE OPTION FOR TRANSMISSION LINE TO BE BUILT
- ROUTE OPTION FOR TRANSMISSION LINE TO BE REBUILT
- TRANSMISSION FACILITIES TO BE REMOVED
- POTENTIAL SWITCH LOCATION
- EXISTING SUBSTATIONS
