

SOUTHEAST OHIO AREA IMPROVEMENTS

Plans are underway for the Southeast Ohio Area Improvements to enhance the electric grid in Monroe, Noble and Washington counties. The approximate \$250 million investment by AEP Ohio is being developed in coordination with local electric cooperatives to support economic development and improve system reliability.

WHAT

Improvements include:

- Building 3 substations
- Upgrading 2 substations
- Constructing approximately 55 miles of 138-kV transmission line
- Upgrading local distribution facilities including poles, wires and substations.

WHY

The approximate \$250 million investment enhances the electric grid and updates infrastructure to support economic development. The modern facilities provide local customers with greater electric service reliability.

WHERE

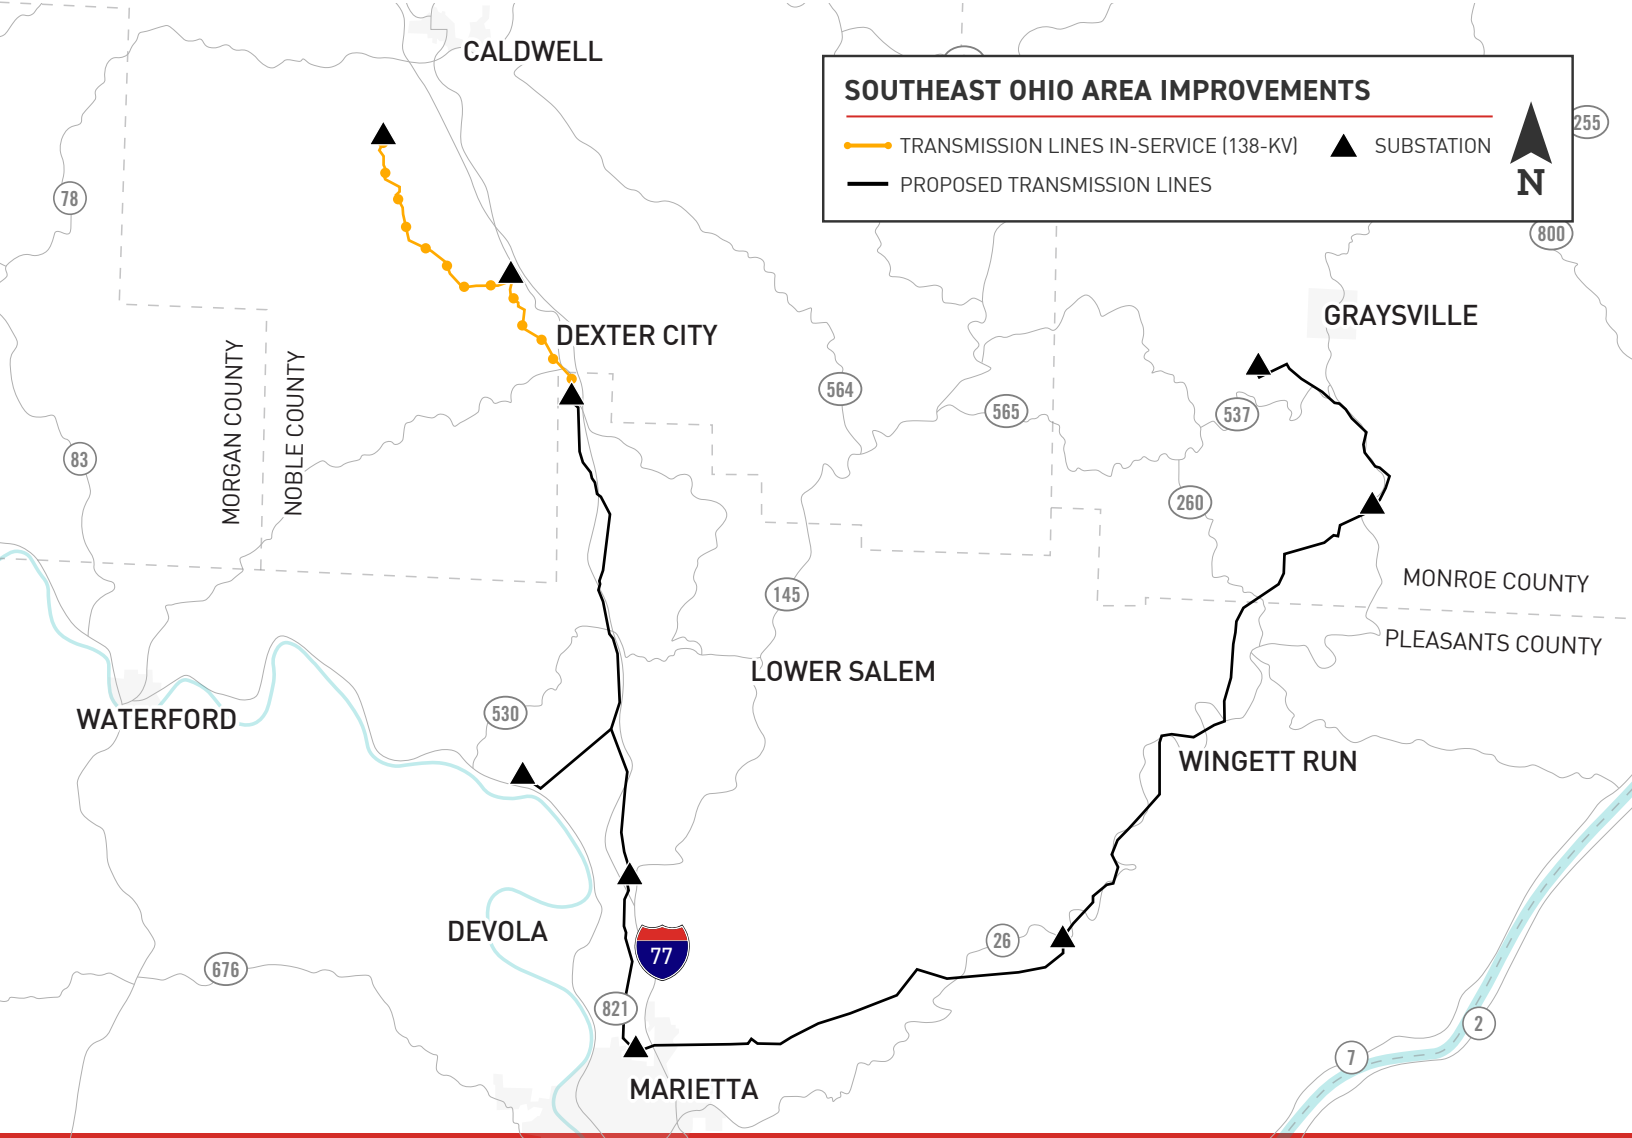

The project area includes Monroe, Noble and Washington counties. Portions of the proposed improvements are now in-service while others continue through construction and detailed engineering.

PROJECT SCHEDULE

*Timeline subject to change.

TYPICAL STRUCTURES

Structure types include steel H-frame and single poles that will be between 70-90 feet tall. Structures will be placed in a 100 foot wide right-of-way corridor.

Exact structure type, height and right-of-way width may vary.

*Exact structure, height and right-of-way requirements may vary
