HAMILTON-BUTLER AREA IMPROVEMENTS

INDIANA MICHIGAN POWER
An AEP Company
BOUNDLESS ENERGY

Indiana Michigan Power (I&M) plans to strengthen the electric transmission system in north-east Indiana. The proposed improvements in DeKalb county involve building about 8 miles of new power line, rebuilding about 8 miles of power lines and rebuilding the Butler substation. These improvements increase reliability, reduce power outages and speed recovery of service when outages occur.

WHAT

The Hamilton-Butler Area Improvements Project involves:

- Rebuilding about 8 miles of 69-kilovolt (kV) line (western section)
- Building about 8 miles of new 69-kV line (eastern section)
- Rebuilding the Butler Substation

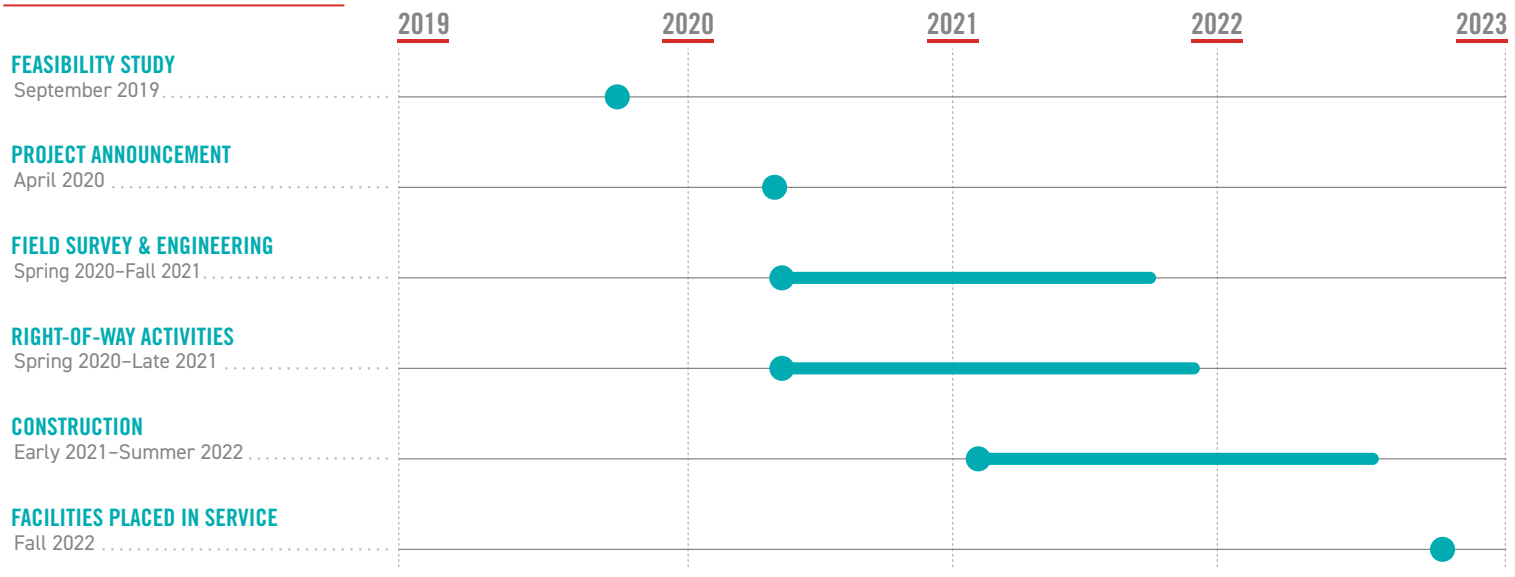
WHY

- Strengthens the local electric transmission system
- Reduces the likelihood of power outages
- Speeds recovery of service when outages occur
- Prepares the electric system to support economic development

WHERE

The upgrades take place in Troy, Stafford and Wilmington townships in northeastern DeKalb County.

PROJECT SCHEDULE



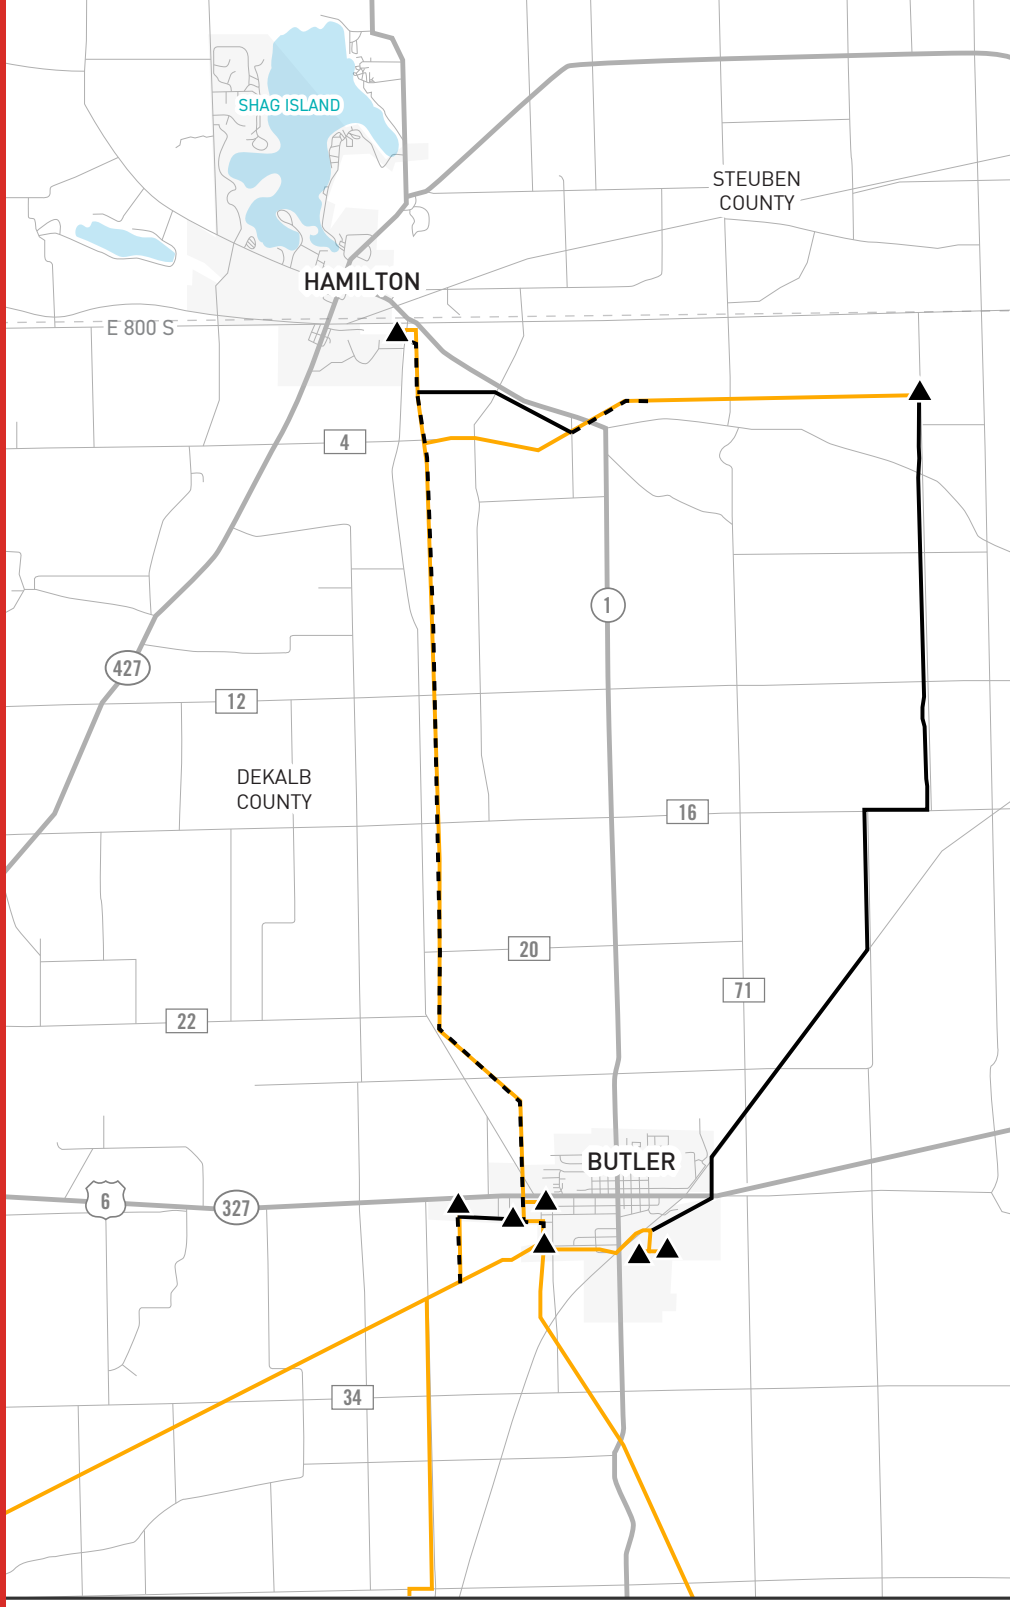
*Timeline subject to change.

TYPICAL STRUCTURES

Steel monopoles structures averaging 75-feet in height. Structures will be placed within a 60-foot right-of-way.

I&M is committed to meeting the energy needs of customers while protecting the environment and natural beauty of the region.

*Exact structure, height and right-of-way requirements may vary



HAMILTON - BUTLER AREA IMPROVEMENTS

- PROPOSED ROUTE
- EXISTING TRANSMISSION LINES
- TRANSMISSION LINE TO BE REBUILT
- SUBSTATION
